

AI Engineer Intern

Do you want to make an impact in healthcare? Attendi is looking for an AI Intern to join our dev team.

Our mission

In the Netherlands, approximately 1 in 6 workers currently work in health care. Looking at the expected future need for health care, this will have to be 1 in 3 workers by 2040. Technology will play an important role in keeping care available and accessible. At Attendi, we work on a solution to this social challenge.

Health care professionals have chosen their profession to help people and connect with them, not to sit in front of a computer. At Attendi, our mission is to enable health care professionals to interact with software the way they do with their clients, simply by using their voices. Our AI software, the Attendi Speech Service, is a solution that allows software suppliers in the health care space to make their solutions fully speech-driven. In Electronic Healthcare Records (EHR), health care professionals can process various registrations with their voice while not losing their sight on clients.

Attendi is a company that is past the start-up phase. Due to our product integrations, Attendi already has a reach of 100.000 health care professionals and this number is growing rapidly. The Attendi Speech Service, which is already in use by health care professionals for daily reporting, is developing into a platform that can be used by software suppliers to make various functionalities speech-driven. An increasing number of health care organizations is discovering the value of this platform, driving Attendi's growth.

Your responsibilities

As an intern, you will be responsible for (1) testing & building new features with LLMs such as GTP-3 for the Attendi Speech Service and (2) improving the ASR engine in terms of accuracy and inference time. You will be working with more than 1000 hours of in-domain audio data. Your work has a direct impact on the work processes of healthcare professionals. Also, you have the option to join job shadowing days with the end user to understand the work process.

Our requirements

We are looking for talented, motivated and above all friendly co-workers. Besides this, you should have

- Interests in NLP
- Knowledge of LLMs
- Proficiency with AI/ML programming language like Python/Go
- Knowledge of ML frameworks like PyTorch, Tensorflow

What we offer

- Working on impactful solutions for problems in health care
- Young, vibrant, smart and above all friendly colleagues
- Internship compensation
- A healthy work-life balance
- The option to do voluntary work during work hours
- We are an equal and diverse opportunity employer
- Amsterdam based, working remotely is possible
