

Lead Developer

Do you want to make an impact in healthcare?

Our mission

In the Netherlands, approximately 1 in 6 workers currently work in health care. Looking at the expected future need for health care, this will have to be 1 in 3 workers by 2040. Technology will play an important role in keeping care available and accessible. At Attendi, we work on a solution to this social challenge.

Health care professionals have chosen their profession to help people and connect with them, not to sit in front of a computer. At Attendi, our mission is to enable health care professionals to interact with software the way they do with their clients, simply by using their voices. Our AI software, the Attendi Speech Service, is a solution that allows software suppliers in the health care space to make their solutions fully speech-driven. In Electronic Healthcare Records (EHR), health care professionals can process various registrations with their voice while not losing their sight on clients.

Attendi is a company that is past the start-up phase. Due to our product integrations, Attendi already has a reach of 100.000 health care professionals and this number is growing rapidly. The Attendi Speech Service, which is already in use by health care professionals for daily reporting, is developing into a platform that can be used by software suppliers to make various functionalities speech-driven. An increasing number of health care organizations is discovering the value of this platform, driving Attendi's growth.

Your responsibilities

As our Lead Developer, you will be responsible for overseeing and guiding the development of the Attendi Speech Service. You will work closely with our team of software and AI engineers, product owner, and other stakeholders to ensure the timely delivery of high-quality software products. Your responsibilities include managing the software development process from start to finish, researching and implementing full stack features from ideation to delivery, developing and maintaining the technical documentation, using best practices, conducting code reviews, and ensuring adherence to coding standards. You will have ownership over the technical product vision, execution, and day-to-day implementation.

Tech Stack

- Attendi Components: React / Typescript for Web and React Native, Swift & Kotlin for Native
- APIs, Backend systems: .NET (REST APIs) / Python / RabbitMQ / VMs & Serverless Functions / SQL Databases

Our requirements

We are looking for a talented, motivated and above all friendly co-worker. Besides this, you should have experience with:

- Leading a software development team
- Full-Stack Development and DevOps
- Strong understanding of product thinking and execution

This includes the ability to write production-level code. Also, you should have experience with the full software development life cycle, including coding standards, code reviews, CI/CD and automated testing.

What we offer

- Working on impactful solutions for problems in health care
- Young, vibrant, smart and above all friendly colleagues
- Good pay and shared ownership
- A healthy work-life balance
- The option to do voluntary work during work hours
- Transparent and responsible personal development
- We are an equal and diverse opportunity employer
- An Amsterdam based office
